

Jhon M. Cuenca

Laboratory Technician | Clinical, Biomedical & Analytical

Bonn-Cologne region • cuenca-john1999.github.io

Additional bases available in Berlin and Madrid • Open to relocation throughout Germany and internationally

PROFESSIONAL PROFILE

Laboratory technician with Spanish vocational qualifications in Clinical & Biomedical Laboratory and Laboratory Operations, with practical experience in immunology, molecular biology and biomass analysis in Spain and Ireland. Hands-on work includes RNA extraction, PCR, electrophoresis, ELISA, Western blot preparation, cell culture and GLP-based analytical work. Currently in the Bonn-Cologne region; German A2 and actively preparing for official certification.

LABORATORY EXPERIENCE

FUNDACIÓN PARA LA INVESTIGACIÓN BIOMÉDICA DEL HOSPITAL UNIVERSITARIO DE LA PRINCESA Madrid, Spain
FCT Internship (370 h) - Immunology & Molecular Biology 03/2025 - 06/2025

- Participated actively in immunology and molecular biology research, including adherent cell culture, media preparation and biological sample processing.
- Hands-on work with RNA extraction, PCR, electrophoresis, transgenic-mouse genotyping, ELISA and Western blot preparation.
- Processed human and animal samples; isolated CD4/CD14 cells and supported immune-cell procedures.
- Participated in immunohistochemical and immunofluorescence staining, protocol work, scientific databases and laboratory material/inventory management.
- Designed and developed a bilingual scientific website to support the research group's visibility and communication.

CELIGNIS BIOMASS ANALYSIS LABORATORY Limerick, Ireland
Erasmus+ Internship - Biomass Analysis 03/2023 - 05/2023

- Analysed biomass and waste samples: moisture, ash, volatile matter, CHNOS elemental composition, ash melting temperature, BMP/biogas, FOS/TAC, ICP, COD, ammonia and NIR.
- Operated equipment including a CHNOS elemental analyser, TGA Q500, CARBOLITE furnaces, BMP units and Biogas 5000; worked under GLP standards, according to SOPs and with internal statistical quality controls.
- Supported calibration, operation, troubleshooting, maintenance/monitoring and sample preparation, plus SOPs and technical documentation; created operational guides, data sheets, work instructions and troubleshooting documentation.
- Progressively took responsibility for the volatile-matter workflow; trained and supervised interns taking over the role after the placement.
- Supported customer work and EU-funded projects including SteamBioAfrica and BIO4Africa.

ADDITIONAL EXPERIENCE

FORM-ED / WASHI Madrid, Spain
Educational Robotics Instructor FORM-ED 2020-2021 | WASHI 2020
Taught STEM subjects to students aged 6 to 12; prepared teaching materials and organised classes.

KARMA SUMINISTROS INTEGRALES Madrid, Spain
Administrative Assistant Summers 2015 - 2017
Supported administrative and documentation tasks.

EDUCATION

CEAC FP OFICIAL

Técnico Superior en Laboratorio Clínico y Biomédico

Madrid, Spain

2023 - 2025

Official Spanish higher vocational qualification (Clinical & Biomedical Laboratory)

- Official final grade: 9.25/10
- Final laboratory project: Bacteriofagoterapia | Redescubriendo una terapia innovadora - 10/10 (co-authored).
- Honours: General Laboratory Techniques, Immunodiagnostic Techniques and Hematological Analysis Techniques.

IES VIRGEN DE LA PALOMA

Técnico en Operaciones de Laboratorio

Madrid, Spain

2021 - 2023

Official Spanish vocational qualification (Laboratory Operations)

- Official final grade: 8.69/10
- Diploma for excellent academic performance in the second year (2023).
- Coursework in applied chemistry, chemical analysis, physicochemical testing, microbiology and biochemistry, materials testing, and laboratory safety/organisation.

COURSES & CERTIFICATIONS

CEAC FP OFICIAL

2025

Healthcare Centre Management specialization course | 100 h

DYNAMIMED S.L.U

2023

Animal Experimentation - Functions A+B+C (Order ECC/566/2015) | 70 h

IES VIRGEN DE LA PALOMA

2023

Basic-level Occupational Risk Prevention training | certificate

Instituto Tecnológico MasterD

2018 - 2020

Automation & Robotics (course certified by Universal Robots) | 875 h · 35 ECTS · grade: Notable

TECHNICAL SKILLS

Molecular biology & immunology: RNA extraction, PCR, electrophoresis, ELISA, Western blot preparation, adherent cell culture, CD4/CD14 isolation and human/animal sample processing.

Experimental techniques: Transgenic-mouse genotyping, immunohistochemistry, immunofluorescence, media preparation and immune-cell workflows.

Analytical laboratory: Moisture, ash, volatile matter, CHNOS elemental composition, ash melting temperature, BMP/biogas, FOS/TAC, ICP, COD, ammonia, NIR and Biogas 5000.

Quality, equipment & documentation: GLP, internal quality controls, calibration and troubleshooting, work according to SOPs and SOP/technical-documentation support; operational guides, data sheets, work instructions, troubleshooting documentation, inventory and traceability.

Digital tools: Microsoft Office, Google Workspace and scientific databases.

Languages: Spanish native, English B2, German A2.
